Education Superbook #3 Book 4. U.S. College Address-Website Guide (Community Colleges Covered Elsewhere) Tony Kelbrat

This book is basically a straight list of American colleges and universities by state and in alphabetical order. There is a list of colleges with religious affiliations.

I cover accrediting agencies, fake college degree diploma mills, college rankings, private colleges, colleges based on demographics like minority and gender.

I list some of the many websites out there that claim to list American colleges. The problem with most of them is that they either give you one college at a time, try to push their advertising sponsor colleges at you or they're otherwise junky.

When I created this book, I knew it would sell because it's simple and straight. Pay me a few bucks. I give you a big straight list that you can scroll through unlike these college list websites where you have to click, click, click and waste time. Often they don't give you a bunch of information so it's not like you got it in your hand so you can explore at will. They'll give you one college at a time, not a list of colleges like all the colleges in a state.

Chapter 1. Accrediting Agencies

College Accreditation Basics

Accreditation is the process of quality assurance for schools and colleges. A higher education authority than the colleges examines them to determine whether they pass their standards of education. This is done to ensure that graduates meet the professional requirements of the profession they're studying.

The main accreditation database is at the U.S. Department of Education's Office of Postsecondary Education.

The USDE does not accredit educational institutions and/or programs, however, they publish a list of nationally recognized accrediting agencies that they determine to be reliable authorities as to the quality of education or training provided by the institutions of higher education and the higher education programs they accredit. They also recognize state agencies for the approval of public postsecondary vocational education and state agencies for the approval of nurse education.

There are many books that come out every year that list American colleges and universities but the master one is the one sanctioned by the Council on Higher Education Accreditation, chea.org called the Higher Education Directory published by Higher Education Publications, hepinc.com. This list is available at the website chea.org.

In Canada, there are several books on Canadian colleges and universities and McClean's magazine publishes a list every year in one of its issues. Just go to the following organization where you'll see a list of all the legitimate colleges and universities in Canada.

Some postsecondary educational institutions and programs elect not to seek accreditation but nevertheless may provide a quality postsecondary education.

Assn. of Universities And Colleges of Canada
350 Albert St.
#600
Ottawa, On K1r 1b1
613-563-1236
Fax: 613-563-9745
info@aucc.ca
aucc.ca

For the rest of the world, your best bet is either of the two books put out by Palgrave Macmillan:

Commonwealth Universities Yearbook based on membership in the Assn. of Commonwealth Universities.

International Handbook of Universities

Unfortunately, there is no one worldwide accrediting agency for higher education. The International Assn. of Universities at unesco.org/iau is about as close as you get but it's full of holes due to lack of funding.
