Quantitative Regional Economic and Environmental Analysis for Sustainability in Korea (New Frontiers in Regional Science: Asian Perspectives)

Quantitative Regional Economic and Environmental Analysis for Sustainability in Korea (New Frontiers in Regional Science: Asian Perspectives)

This book focuses on the application of newly innovated analytical tools for sustainable development on regional economic and environmental issues in Korea. With a range of case studies, the authors explore a series of theoretical models and empirical methods including spatial CCE Model, multiregional Input-Output and econometric analysis, logit model, contingent valuation method, GIS, sample selection model, machine learning technique, stochastic frontier analysis, Markov chain model and panel analysis. These models and methods are tailored to spatial development issues such as agglomeration, clustering and industrial innovation, human capital and labor market, education and R&D investments and economic resilience for regional economies and unexpected disaster, quarantine system and disease, and natural resources for environmental markets. *Quantitative Regional Economic and Environmental Analysis for Sustainability in Korea* is of particular interest to policy makers and practitioners, as well as research scholars active in sustainability science.
