Chemistry: A Molecular Approach with MasteringChemistry® Access Code (2nd Edition) (MasteringChemistry Series) Nivaldo J. Tro

This innovative text explains difficult concepts in a relevant, student-oriented manner. Chemistry is presented visually through multi-level images—macroscopic, molecular and symbolic representations—helping you see the connections among the formulas (symbolic), the world around you (macroscopic), and the atoms and molecules that make up the world (molecular). Among other revisions, the **Second Edition** offers a crisp new design, adds more challenging problems, and significantly revises coverage of electrochemistry. Used by over a million science students, the **Mastering** platform is the most effective and widely used online tutorial, homework, and assessment system for the sciences.
