Social Action: A Teleological Account Seumas Miller

Social action is central to social thought. This book provides philosophical analyses of fundamental categories of human social action, including cooperative action, conventional action, social norm governed action, and the actions of the occupants of organizational roles. These theories of social action categories are then applied to issues such as environmental pollution, humanitarian intervention and rights of minority groups. Avoiding both the excessively atomistic individualism of rational choice theorists and implausible collectivist assumptions, this important book will be widely read by philosophers of the social sciences, political scientists and sociologists.
