## **Are the Androids Dreaming Yet?: Amazing Brain. Human Communication, Creativity & Free Will.**

James Tagg

How Alan Turing invented the computer, helped win world war II and left us with one of the greatest puzzles of our time: are humans simply computers or are we more than that? Many scientists think we have a tenuous hold on the title, “most intelligent being on the planet”. They think it’s just a matter of time before computers become smarter than us, and then what? This book charts a journey through the science of information, from the origins of language and logic, to the frontiers of modern physics. From Lewis Carroll’s logic puzzles, through Alan Turing and his work on Enigma and the imitation game, to John Bell’s inequality, and finally the Conway-Kochen ‘Free Will’ Theorem. How do the laws of physics give us our creativity, our rich experience of communication and, especially, our free will?
