Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)

Hans van Houwelingen, Hein Putter

Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Hans van Houwelingen, Hein Putter

There is a huge amount of literature on statistical models for the prediction of survival after diagnosis of a wide range of diseases like cancer, cardiovascular disease, and chronic kidney disease. Current practice is to use prediction models based on the Cox proportional hazards model and to present those as static models for remaining lifetime after diagnosis or treatment. In contrast, **Dynamic Prediction in Clinical Survival Analysis** focuses on dynamic models for the remaining lifetime at later points in time, for instance using landmark models.

Designed to be useful to applied statisticians and clinical epidemiologists, each chapter in the book has a practical focus on the issues of working with real life data. Chapters conclude with additional material either on the interpretation of the models, alternative models, or theoretical background. The book consists of four parts:

- *Part I* deals with prognostic models for survival data using (clinical) information available at baseline, based on the Cox model
- *Part II* is about prognostic models for survival data using (clinical) information available at baseline, when the proportional hazards assumption of the Cox model is violated
- *Part III* is dedicated to the use of time-dependent information in dynamic prediction
- *Part IV* explores dynamic prediction models for survival data using genomic data

Dynamic Prediction in Clinical Survival Analysis summarizes cutting-edge research on the dynamic use of predictive models with traditional and new approaches. Aimed at applied statisticians who actively analyze clinical data in collaboration with clinicians, the analyses of the different data sets throughout the book demonstrate how predictive models can be obtained from proper data sets.

From reader reviews:

George Gentry:

Now a day people that Living in the era wherever everything reachable by connect with the internet and the resources in it can be true or not call for people to be aware of each data they get. How individuals to be smart in getting any information nowadays? Of course the correct answer is reading a book. Studying a book can help persons out of this uncertainty Information specifically this Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) book because book offers you rich info and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you know.

Betty Serrano:

Nowadays reading books are more than want or need but also work as a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with education and learning books but if you want sense happy read one having theme for entertaining for example comic or novel. Typically the Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is kind of book which is giving the reader unforeseen experience.

Matthew Hansen:

Hey guys, do you would like to finds a new book to see? May be the book with the title Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) suitable to you? The particular book was written by well-known writer in this era. The actual book untitled Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)is a single of several books which everyone read now. This book was inspired many men and women in the world. When you read this reserve you will enter the new age that you ever know prior to. The author explained their idea in the simple way, therefore all of people can easily to comprehend the core of this publication. This book will give you a lots of information about this world now. In order to see the represented of the world with this book.

Kristen Blasingame:

In this era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time not very much but quite enough to possess a look at some books. One of many books in the top record in your reading list is definitely Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). This book which can be qualified as The Hungry Inclines can get you closer in turning into precious person. By looking

way up and review this book you can get many advantages.
