High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry)

High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry)

Micropropagation of plants is a multi billion dollar industry being practiced in hundreds of small and large nurseries and commercial laboratories throughout the world. At present, it is the only component of plant biotechnology which has been commercially exploited on such a large scale, especially for the production of ornamentals. Now micropropagation of trees and medicinal plants has also assumed great importance. With recent progress made in the propagation of fruit and forest trees, and the immediate need for afforestation and planting of orchards, propagules and plantlets are required quickly and in large numbers. Taking these points into consideration High-Tech and Micropropagation I, II, III, and IV were published in 1991 and 1992. The present two volumes, High-Tech and Micropropagation V and VI, comprise 51 chapters contributed by international experts from 24 countries. High-Tech and Micropropagation V comprises 24 chapters arranged into the following three sections: 1. Vegetables and fruits (garlic, Amaranthus, Brassica oleracea, pepper, watermelon, cassava, banana, Myrtus communis, passionfruit, Polymnia sonchifolia, pepino, and spinach) 2. Grasses (bamboos, Caustis dioica, Dendrocalamus, Miscanthus x giganteus, sugarcane) 3. Trees (Aegle marmelos, Eucalyptus, Fraxinus excelsior, Juglans cinerea, Pinus virginiana, Prosopis, and Ulmus species) High-Tech and Micropropagation VI comprises 27 chapters arranged in two sections: 1. Ornamental and aromatic plants (Amaryllis, Anthurium, Blandfordia, bromeliads, Campanula, Coleus, Ctenanthe, Cyclamen, Daphne, Dracaena, Gerbera, Helianthemum, Hippeastrum, Leucojum, Mammillaria, Maranta, Mediocactus, Mussaenda, Narcissus, Otacanthus, ponytail palm, Prunus tenella, Spiranthes, and Zinnia) 2.

From reader reviews:

Charles Tapia:

Information is provisions for those to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even an issue. What people must be consider whenever those information which is in the former life are challenging to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you obtain the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry) as the daily resource information.

Richard Burnett:

Reading a e-book tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story or perhaps their experience. Not only situation that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors in this world always try to improve their proficiency in writing, they also doing some investigation before they write for their book. One of them is this High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry).

Kathleen Bonds:

Exactly why? Because this High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry) is an unordinary book that the inside of the publication waiting for you to snap this but latter it will surprise you with the secret the item inside. Reading this book adjacent to it was fantastic author who also write the book in such incredible way makes the content on the inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book possess such as help improving your talent and your critical thinking method. So , still want to delay having that book? If I had been you I will go to the guide store hurriedly.

Terrance Pitt:

Many people said that they feel weary when they reading a publication. They are directly felt it when they get a half parts of the book. You can choose often the book High-Tech and Micropropagation VI (Biotechnology in Agriculture and Forestry) to make your current reading is interesting. Your skill of reading skill is developing when you like reading. Try to choose basic book to make you enjoy to see it and mingle the impression about book and reading especially. It is to be 1st opinion for you to like to open a book and study it. Beside that the book High-Tech and Micropropagation VI (Biotechnology in Agriculture

and Forestry) can to be your friend when you're feel alone and confuse with the information must you're doing of the time.
