Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing)

Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing)

This book provides a state-of-the art overview of satellite archaeology and it is an invaluable volume for archaeologists, scientists, and managers interested in using satellite Earth Observation (EO) to improve the traditional approach for archaeological investigation, protection and management of Cultural Heritage.

The recent increasing development of EO techniques and the tremendous advances in Information and Communication Technologies (ICT) have resulted primarily in Cultural Heritage applications. The book focuses on new challenging prospects for the use of EO in archaeology not only for probing the subsurface to unveil sites and artifacts, but also for the management and valorization as well as for the monitoring and preservation of cultural resources. The book provides a first-class understanding of this revolutionary scenario which was unthinkable several years ago.

The book offers: (i) an excellent collection of outstanding articles focusing on satellite data processing, analysis and interpretation for archaeological applications, (ii) impressive case studies, (iii) striking examples of the high potential of the integration of multi-temporal, multi-scale, multi-sensors techniques.

Each chapter is composed as an authoritative contribution to help the reader grasp the value of its content. The authors are renowned experts from the international scientific community.

Audience: This book will be of interest to scientists in remote sensing applied to archeology, geoarcheology, paleo-environment, paleo-climate and cultural heritage.

From reader reviews:

Kerry Diaz:

This Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this publication incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This particular Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) without we recognize teach the one who reading through it become critical in pondering and analyzing. Don't end up being worry Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) can bring when you are and not make your tote space or bookshelves' grow to be full because you can have it in your lovely laptop even cellphone. This Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) having fine arrangement in word along with layout, so you will not truly feel uninterested in reading.

Jacqueline Gore:

Now a day people that Living in the era wherever everything reachable by talk with the internet and the resources inside it can be true or not involve people to be aware of each facts they get. How a lot more to be smart in acquiring any information nowadays? Of course the solution is reading a book. Examining a book can help people out of this uncertainty Information mainly this Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) book because book offers you rich info and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it you know.

James Chapman:

This book untitled Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital Image Processing) to be one of several books in which best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit in it. You will easily to buy this book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Touch screen phone. So there is no reason for your requirements to past this publication from your list.

John Merritt:

People live in this new morning of lifestyle always try and and must have the spare time or they will get lots of stress from both daily life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will unlimited right. Then ever try this one, reading ebooks. It can be your alternative inside spending your spare time, the actual book you have read is definitely Satellite Remote Sensing: A New Tool for Archaeology (Remote Sensing and Digital

Image Processing).
