Security for Wireless Sensor Networks using Identity-Based Cryptography

Harsh Kupwade Patil, Stephen A. Szygenda

Security for Wireless Sensor Networks using Identity-Based Cryptography Harsh Kupwade Patil, Stephen A. Szygenda

Security for Wireless Sensor Networks using Identity-Based Cryptography introduces identity-based cryptographic schemes for wireless sensor networks. It starts with an exhaustive survey of the existing layered approach to WSN security—detailing its pros and cons. Next, it examines new attack vectors that exploit the layered approach to security.

After providing the necessary background, the book presents a cross-layer design approach that addresses authentication, integrity, and encryption. It also examines new ID-based key management mechanisms using a cross-layer design perspective. In addition, secure routing algorithms using ID-based cryptography are also discussed. Supplying readers with the required foundation in elliptic curve cryptography and identity-based cryptography, the authors consider new ID-based security solutions to overcome cross layer attacks in WSN.

Examining the latest implementations of ID-based cryptography on sensors, the book combines cross-layer design principles along with identity-based cryptography to provide you with a new set of security solutions that can boost storage, computation, and energy efficiency in your wireless sensor networks.

From reader reviews:

Christina Love:

Now a day folks who Living in the era wherever everything reachable by connect with the internet and the resources inside can be true or not demand people to be aware of each facts they get. How people have to be smart in acquiring any information nowadays? Of course the solution is reading a book. Studying a book can help persons out of this uncertainty Information specifically this Security for Wireless Sensor Networks using Identity-Based Cryptography book because this book offers you rich facts and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you probably know this.

Heather Sessoms:

Information is provisions for people to get better life, information currently can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider while those information which is in the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you have the unstable resource then you have it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Security for Wireless Sensor Networks using Identity-Based Cryptography as the daily resource information.

Linda Henderson:

This book untitled Security for Wireless Sensor Networks using Identity-Based Cryptography to be one of several books this best seller in this year, here is because when you read this book you can get a lot of benefit on it. You will easily to buy this particular book in the book retail store or you can order it through online. The publisher of the book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Cell phone. So there is no reason to you personally to past this publication from your list.

Angela Harris:

Spent a free time and energy to be fun activity to do! A lot of people spent their leisure time with their family, or their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could possibly be reading a book might be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled Security for Wireless Sensor Networks using Identity-Based Cryptography can be fine book to read. May be it might be best activity to you.
