Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology)

Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology)

Fluorescent nucleic acid probes, which use energy transfer, include such constructs as molecular beacons, molecular break lights, Scorpion primers, TaqMan probes, and others. These probes signal detection of their targets by changing either the intensity or the color of their fluorescence. Not surprisingly, these luminous, multicolored probes carry more flashy names than their counterparts in the other fields of molecular biology. In recent years, fluorescent probes and assays, which make use of energy transfer, have multiplied at a high rate and have found numerous applications. However, in spite of this explosive growth in the field, there are no manuals summarizing different protocols and fluorescent probe designs. In view of this, the main objective of *Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols* is to provide such a collection. Oligonucleotides with one or several chromophore tags can form fluorescent probes capable of energy transfer. Energy transport within the probe can occur via the resonance energy transfer mechanism, also called Förster transfer, or by non-Förster transfer mechanisms. Although the probes using Förster transfer were developed and used first, the later non-Förster-based probes, such as molecular beacons, now represent an attractive and widely used option. The term “fluorescent energy transfer probes” in the title of this book covers both Förster-based fluorescence resonance energy transfer (FRET) probes and probes using non-FRET mechanisms. Energy transfer probes serve as molecule-size sensors, changing their fluorescence upon detection of various DNA reactions.

From reader reviews:

Ena Clark:

This Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is actually information inside this publication incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This specific Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) without we know teach the one who studying it become critical in considering and analyzing. Don't end up being worry Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) can bring any time you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even telephone. This Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) having excellent arrangement in word as well as layout, so you will not experience uninterested in reading.

Bill Dildy:

As people who live in the modest era should be revise about what going on or data even knowledge to make these people keep up with the era that is always change and move ahead. Some of you maybe can update themselves by studying books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which one you should start with. This Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

Philip Newman:

The reserve untitled Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) is the book that recommended to you to study. You can see the quality of the guide content that will be shown to you actually. The language that creator use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, to ensure the information that they share for you is absolutely accurate. You also could possibly get the e-book of Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology) from the publisher to make you much more enjoy free time.

Raymond Floyd:

What is your hobby? Have you heard that will question when you got college students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And you know that little person like reading or as studying become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update regarding something by book.

Amount types of books that can you decide to try be your object. One of them is Fluorescent Energy Transfer Nucleic Acid Probes: Designs and Protocols (Methods in Molecular Biology).
