Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource Stanley E. Manahan

Carefully crafted to provide a comprehensive overview of the chemistry of water in the environment, **Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource** examines water issues within the broad framework of sustainability, an issue of increasing importance as the demands of Earth's human population threaten to overwhelm the planet's carrying capacity. Renowned environmental author Stanley Manahan provides more than just basic coverage of the chemistry of water. He relates the science and technology of this amazing substance to areas essential to sustainability science, including environmental and green chemistry, industrial ecology, and green (sustainable) science and technology. The inclusion of a separate chapter that comprehensively covers energy, including renewable and emerging sources, sets this book apart.

Manahan explains how the hydrosphere relates to the geosphere, atmosphere, biosphere, and anthrosphere. His approach views Planet Earth as consisting of these five mutually interacting spheres. He covers biogeochemical cycles and the essential role of water in these basic cycles of materials. He also defines environmental chemistry and green chemistry, emphasizing water's role in the practice of each. Manahan highlights the role of the anthrosphere, that part of the environment constructed and operated by humans. He underscores its overwhelming influence on the environment and its pervasive effects on the hydrosphere. He also covers the essential role that water plays in the sustainable operation of the anthrosphere and how it can be maintained in a manner that will enable it to operate in harmony with the environment for generations to come.

Written at an intermediate level, this is an appropriate text for the study of current affairs in environmental chemistry. It provides a review and grounding in basic and organic chemistry for those students who need it and also fills a niche for an aquatic chemistry book that relates the hydrosphere to the four other environmental spheres.

From reader reviews:

Ross Turner:

Now a day people who Living in the era where everything reachable by connect with the internet and the resources included can be true or not need people to be aware of each details they get. How individuals to be smart in having any information nowadays? Of course the reply is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource book because book offers you rich info and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you may already know.

Karen Schanz:

The book Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource will bring you to definitely the new experience of reading a new book. The author style to elucidate the idea is very unique. In case you try to find new book you just read, this book very suitable to you. The book Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource is much recommended to you to read. You can also get the e-book from the official web site, so you can more easily to read the book.

Lena Lewis:

Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource can be one of your basic books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort that will put every word into enjoyment arrangement in writing Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource however doesn't forget the main position, giving the reader the hottest and based confirm resource data that maybe you can be one among it. This great information can easily drawn you into brand new stage of crucial pondering.

James Voyles:

Many people spending their time period by playing outside having friends, fun activity with family or just watching TV the whole day. You can have new activity to pay your whole day by examining a book. Ugh, do you consider reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smartphone. Like Water Chemistry: Green Science and Technology of Nature's Most Renewable Resource which is keeping the e-book version. So , try out this book? Let's notice.
