Book#1: Prepper's Survival Pantry. 30 Essential Tips on How to Survive Any Disaster in an Urban Environment.

What if the worst should happen? In the modern world we are increasingly reliant on external systems to support our way of life — electricity to power our homes, the internet to supply information, clean water piped directly into our homes and a culture of disposability and convenience that encourages us to simply buy what we need when we need it. If a crisis should disrupt these systems, either temporarily or long-term, would you know what to do to ensure the best chances of health and survival for your household?

In this book we will look at both short and long-term strategies for dealing with disruption to vital services:

We will look together at preparations you can make in advance to safeguard yourself before a catastrophe, as well as discussing actions to take in the moment, whether you have had time to prepare or not. Many people have survived life-or-death situations due to their own quick thinking and repurposing of the materials they had to hand.

DIY Survival Hacks to Survive Anything: Outstanding DIY Household Survival Techniques

Have you ever wondered what it would be like to live on your own without anyone there to help you find food, water, and shelter?

Whether the thought of this happening frightens or excites you or maybe both, you should be prepared for the worst to happen. Natural disasters occur every year and thousands of people are left stranded without fresh water, food, and even shelter during a time when they really need it. Being prepared for something like this will ensure that you are one of the survivors rather than the people who have perished wondering if they could have been better equipped.
