"Using both his understanding of the human brain and the relationship between brain chemicals and hormones and chronic conditions that plague millions of people, Dr. Michael L. Johnson provides a foundation of multi-disciplinary healing that can be applied to anyone tired of dealing with debilitating migraines, chronic fatigue syndrome, fibromyalgia, vertigo, numbness and a variety of other conditions.

This book doesn't just outline theories and offer up treatments. It explains in fully understandable detail why our bodies react the way they do, how we become diseased in the first place, what role the brain plays in our aches and ailments, and how the combination of chiropractic techniques and neurological treatments that target the brain can provide a relief from pain that ordinary pills and procedures cannot.
