## **Space-Time Algebra** David Hestenes

This small book started a profound revolution in the development of mathematical physics, one which has reached many working physicists already, and which stands poised to bring about far-reaching change in the future.

At its heart is the use of Clifford algebra to unify otherwise disparate mathematical languages, particularly those of spinors, quaternions, tensors and differential forms. It provides a unified approach covering all these areas and thus leads to a very efficient ‘toolkit’ for use in physical problems including quantum mechanics, classical mechanics, electromagnetism and relativity (both special and general) – only one mathematical system needs to be learned and understood, and one can use it at levels which extend right through to current research topics in each of these areas.

These same techniques, in the form of the ‘Geometric Algebra’, can be applied in many areas of engineering, robotics and computer science, with no changes necessary – it is the same underlying mathematics, and enables physicists to understand topics in engineering, and engineers to understand topics in physics (including aspects in frontier areas), in a way which no other single mathematical system could hope to make possible.

There is another aspect to Geometric Algebra, which is less tangible, and goes beyond questions of mathematical power and range. This is the remarkable insight it gives to physical problems, and the way it constantly suggests new features of the physics itself, not just the mathematics. Examples of this are peppered throughout ‘Space-Time Algebra’, despite its short length, and some of them are effectively still research topics for the future.

From the Foreword by Anthony Lasenby

### From reader reviews:

#### **Paul McKinney:**

The guide untitled Space-Time Algebra is the publication that recommended to you to see. You can see the quality of the publication content that will be shown to anyone. The language that article author use to explained their ideas are easily to understand. The article author was did a lot of exploration when write the book, so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Space-Time Algebra from the publisher to make you far more enjoy free time.

#### **Geraldine Davis:**

Your reading 6th sense will not betray a person, why because this Space-Time Algebra guide written by well-known writer we are excited for well how to make book which can be understand by anyone who else read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your own hunger then you still skepticism Space-Time Algebra as good book not only by the cover but also from the content. This is one book that can break don't judge book by its include, so do you still needing yet another sixth sense to pick this particular!? Oh come on your reading through sixth sense already told you so why you have to listening to yet another sixth sense.

#### **Lori Gonzales:**

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Space-Time Algebra can make you truly feel more interested to read.

#### **John Davis:**

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person including reading or as reading become their hobby. You need to know that reading is very important as well as book as to be the matter. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is actually Space-Time Algebra.
