Praise for the *Third Edition*

"This book provides in-depth coverage of modelling techniques used throughout many branches of actuarial science. . . . The exceptional high standard of this book has made it a pleasure to read."
—Annals of Actuarial Science

Newly organized to focus exclusively on material tested in the Society of Actuaries' Exam C and the Casualty Actuarial Society's Exam 4, *Loss Models: From Data to Decisions, Fourth Edition* continues to supply actuaries with a practical approach to the key concepts and techniques needed on the job. With updated material and extensive examples, the book successfully provides the essential methods for using available data to construct models for the frequency and severity of future adverse outcomes.

The book continues to equip readers with the tools needed for the construction and analysis of mathematical models that describe the process by which funds flow into and out of an insurance system. Focusing on the loss process, the authors explore key quantitative techniques including random variables, basic distributional quantities, and the recursive method, and discuss techniques for classifying and creating distributions. Parametric, non-parametric, and Bayesian estimation methods are thoroughly covered along with advice for choosing an appropriate model.
New features of this *Fourth Edition* include:

- Expanded discussion of working with large data sets, now including more practical elements of constructing decrement tables
- Added coverage of methods for simulating several special situations
- An updated presentation of Bayesian estimation, outlining conjugate prior distributions and the linear exponential family as well as related computational issues

Throughout the book, numerous examples showcase the real-world applications of the presented concepts, with an emphasis on calculations and spreadsheet implementation. A wealth of new exercises taken from previous Exam C/4 exams allows readers to test their comprehension of the material, and a related FTP site features the book's data sets.

Loss Models, Fourth Edition is an indispensable resource for students and aspiring actuaries who are preparing to take the SOA and CAS examinations. The book is also a valuable reference for professional actuaries, actuarial students, and anyone who works with loss and risk models.

From reader reviews:

Sharon Doyle:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a guide. Beside you can solve your condition; you can add your knowledge by the book entitled Loss Models: From Data to Decisions (Wiley Series in Probability and Statistics). Try to make book Loss Models: From Data to Decisions (Wiley Series in Probability and Statistics) as your friend. It means that it can to become your friend when you experience alone and beside regarding course make you smarter than ever before. Yeah, it is very fortuned to suit your needs. The book makes you considerably more confidence because you can know anything by the book. So , let's make new experience in addition to knowledge with this book.

Cheryl Cooley:

The e-book with title Loss Models: From Data to Decisions (Wiley Series in Probability and Statistics) contains a lot of information that you can study it. You can get a lot of benefit after read this book. This book exist new know-how the information that exist in this book represented the condition of the world now. That is important to yo7u to know how the improvement of the world. That book will bring you inside new era of the the positive effect. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Diane Sanchez:

As we know that book is important thing to add our understanding for everything. By a reserve we can know everything we want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This reserve Loss Models: From Data to Decisions (Wiley Series in Probability and Statistics) was filled about science. Spend your extra time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a new book. If you know how big advantage of a book, you can feel enjoy to read a e-book. In the modern era like now, many ways to get book that you simply wanted.

David Gilbert:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or outlined from each source that filled update of news. With this modern era like currently, many ways to get information are available for you actually. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just trying to find the Loss Models: From Data to Decisions (Wiley Series in Probability and Statistics) when you needed it?
